

FIXED NUCLEAR FACILITY INCIDENT WARNING

A warning concerning an incident or emergency at a Fixed Nuclear Facility will normally be received via telephone by the State Emergency Operations Officer (SEOO), who will, according to the established procedures, send out a message over both NAWAS and ACCESS, as outlined below.

1. For an accident at a Fixed Nuclear Facility, the Duty Officer will transmit the appropriate message over NAWAS (para 2A or 3A below) with a "hard copy" ACCESS message (para 2B or 3B below) over the Law Enforcement Teletype System (LETS). If needed, the Duty Officer will have a Telecommunications Coordinator from the Telecommunications Section assist in preparing/transmitting these messages.

2. **HANFORD FNF (CGS OR U.S. DOE) INCIDENT**

A. NAWAS procedures/message:

RING STATIONS..."This is the Washington Warning Point..
